

Purchasing has never been easier.

Digital payments offer a safe, convenient way to buy.

Why pay digitally?

- It's **safe**. Keep your card number private.
- It's **fast**. Online purchases can often be made with a click of a button from your mobile device.
- It's **flexible**. Download your favorite digital wallet, add your card to your phone's mobile wallet to pay with Apple Pay, Google Pay or Samsung Pay at participating vendors.

What are digital payments?

Digital payments transform your debit card into virtual payment tool. Your card and billing information are securely stored in a digital wallet or on your device to easily make payments online and in-store. Simply click to pay or scan your mobile device at a participating merchant to complete your transaction.
